## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/24/2005 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Hood et al (5,975,081).

Claim 1 - the device as a whole is a room having wellness apparatus, element -26- is a chamber forming device (living unit), element -46- is a control device, elements -74- are biosensors and the system is directly controlled based on the sensed parameters, column 18 lines 40-44 and claim 1 are examples. It is the examiner's position that "room" is a broad term as defined by Webster's Ninth New Collegiate Dictionary – an extent of space occupied by or sufficient or available for something.

Art Unit: 3736

Hood teaches a device that has sufficient space to live in at least temporarily. The applicant has not set forth any specific definition in the specification at the time the application was filed to define the "room" differently from the common definition. In this case the system -10- is considered a "room" having a living unit -26-. The device is portable and therefore clearly capable of being installed in a house.

Claim 2 - temperature is sensed, column 22, lines 39-52.

Claim 3 - the system is a closed loop system, column 25, lines 1-20.

Claims 4 and 5 - the biosensors are connected to a control device via a radio link, applicant's attention is invited to element -817-.

Claim 6 - the humidity of the O<sub>2</sub> content is considered to be a composition of fluidic media.

Claim 7 - pressure in the chamber is controlled, column 10, lines 30-45.

Claim 8 - acoustic and light is controlled, column 22, lines 39-52.

### ***Response to Arguments***

The applicant has argued that claim 1 require a non-transportable device. Such a limitation is not present in the claims as now amended.

The applicant has argued that the claimed invention is for installation in a variety of places while the device of Hood is not. It is the examiner's position that the device of Hood is capable of being installed in any of the places set forth in the claim.

The applicant also sets forth that the device is suitable for temporary and/or long-term living. It is the examiner's position that the device of Hood is capable of being used for at least temporary living.

The applicant further argues that the device of Hood is not suitable for a person to live for a "continuous /steady period" of time, pages 6/7 of applicant's response. It is the examiner's position that the claims do not contain such a limitation.

Finally, the applicant argues that Hood does not show an apparatus "to be installed..." It is the examiner's position that the device of Hood is capable of being placed in any of the claims places. The examiner is taking placing the apparatus of Hood in the desired room as "installing" the device of Hood at in that room:

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Samuel G. Gilbert whose telephone number is 571-272-4725. The examiner can normally be reached on Monday-Friday 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenberg can be reached on 571-272-4726. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
